

Only Lift without a Cross Member

Raptor Lift's NZD Boat Lift Series

Unlike traditional boat lifts who utilize a cross-member beam, Raptor Lifts developed patented cantilever arms that cradles your hull. Unrestricted by a cross member beam, the NZD (nearly zero depth) series delivers:

Exclusive Benefits:

Lowest Water Depth Capability - 1/2"

Longest Travel Range

Prop Friendly

Stealth Drive

Drive Through Capability

NZD6000 shown

Stealth Drive

NEW Raptor Lifts Stealth Motor

- Dual gearbox
- No chains or belts = no maintenance
- Fastest DC powered lift in market
- Single layer grooved drum = less cable wear
- Soft start and stop capability
- Programmable upper and lower limit switches
- Wireless operation
- 12 VDC and 24 VDC capable
