

# Ultimate Shallow Water Boat Lift

[raptorliftsmarine.com](http://raptorliftsmarine.com)

# Only Lift Without A Crossmember

Raptor Lifts is **the only innovative and patented boat lift in the market without a cross-member**. Unlike traditional boat lifts who utilize a cross-member beam or platform, Raptor Lifts developed ground-breaking cantilever arms that cradle and lift boats.

**Why does that matter?** Cross-members or platforms can limit capabilities. By removing the cross-member, Raptor lifts maximizes operability while expanding functionality in the shallowest of waters.

## Exclusive Benefits:

**1/2"**  
Water Depth  
Capability

**Longest**  
Travel Range

**Prop**  
Friendly

**Drive Through**  
Capability

**7,500LB &  
10,000LB  
Options**

## The Difference:
